

General Order Number 10

May 7, 2012

To Officers and Members

Johnson Creek Fire & EMS Department

Effective May 7, 2012

All vehicles must be moved out of the station as soon as possible immediately after they are started and can be moved safely. This is to help avoid excess diesel fumes and smoke in the station, infiltration into the office and classroom areas, and most importantly to lower the exposure levels for all personnel within the station. Diesel exhaust is a killer and the hazard is much worse than ever thought. Please do your best to comply to this order and protect the health and safety of your brother and sister responders.

This order will take effect and be in force on and after 0700 hours on the date indicated.

David F. Peterson

Fire Chief
